

PROBABILITY IN QUANTUM MECHANICS CONFERENCE

Location: London School of Economics

Dates: Mon Feb 16, 2004

8.30-9.00 Coffee

9.00-9.30 Stephan Hartmann (LSE): Introduction

9.30-10.15 Jos Uffink (Utrecht): Historical Lessons for Quantum Probability

Coffee Break

10.45-11.00 Christopher Fuchs (Dublin): What is the Difference between a Quantum Observer and a Weatherman?

11.00-11.45 Ruediger Schack (Royal Holloway, London): From Degrees of Belief to Quantum Process Tomography

Break

12.00-12.45 David Wallace (Oxford): Quantum Probability from Subjective Uncertainty

14.00-14.45 Dennis Dieks (Utrecht): Probability without Collapses

14.45-15.30 Guido Bacciagaluppi (Freiburg): Quantum Information, Realism and All That

Coffee Break

16.00-16.45 Simon Saunders (Oxford): Probability as Emerging from Decoherence

16.45-17.15 Michael Redhead (LSE): Comments on papers

Room T 206 (Lakatos Building) Free and open to all. No ticket required.
